

# CRYPTOCURRENCY 101

## **Workshop Overview**

This workshop will give users a full understanding of the blockchain technology, the system that underpins Cryptocurrency. You will look at the various uses of different Crypto, of which there are over a thousand different currencies. You will get hands on with the various hard, virtual and paper wallets, and understand the roles of exchanges. You will then make transactions with Bitcoin and Ethereum, then search for the evidence in the blockchain. Your day will conclude with discussions and presentations around the investigative opportunities available.

## **Target Audience**

Learners should have previous training or experience in Internet Investigations or OSINT.

## **Venue**

Delivered in our dedicated IT training facility in Liverpool City Centre.

## **Cost**

£200 + VAT
