

OSINT ESSENTIALS

Course Overview

If you need one course to cover everything for online research and intelligence gathering, OSINT Essentials is the course for you. This course covers a wide range of skills from foundation to advanced tradecraft.

Aim

To provide delegates with the essential tradecraft skills required to gather intelligence and evidence from the Internet & Web. Provide delegates with the confidence to access and research publicly available (Open Source) information from the clear, deep and dark web by means of lectures, presentations and practical hands-on skills sessions.

Target Audience

This course is designed for persons who need to gather information from the internet and web in a methodical and structured manner for the purpose of either investigation, intelligence gathering, due diligence or vetting. If you work in a role where you use the internet for such a purpose then the course will give you the fundamental skills and knowledge and help you to become more efficient and effective.

Learning Objectives

Upon completion of the course, delegates will have developed an understanding in the following areas:

- Operational & Cyber Security
- Online search techniques including advanced and custom searches
- Social Media Research including LinkedIn, Twitter & Facebook
- Website Research & Analysis
- Image File Examination
- Online Mapping Systems
- Building an OSINT Tool Kit

Venue

Delivered in our purpose built IT training facility, located in Liverpool city centre.

Cost

£600 + VAT
