

ONLINE PERSONA TRADECRAFT

Workshop Overview

To be an effective OSINT/ III operator you will need an array of online accounts to be able to access certain websites. When operating covertly you may need to utilise false personas in order to stay secure online.

This workshop will give step by step guidance on the tradecraft to create, build, maintain and manage online assets such as accounts and personas and ensure that you employ the correct tradecraft to avoid detection and frustrating shut downs.

We will show you how to build credible personas for online research across a range of social media websites.

Target Audience

Learners should have previous training or experience in Internet Investigations or OSINT

Venue

Delivered in our dedicated IT training facility in Liverpool City Centre.

Cost

£200 + VAT
